

John Winn's GALAXY OF THRILLSSM

CYBER CYCLETM *Midair Motorcycle Madness!*

Towering some fifty feet high in the air stands John Winn's original Cyber CycleTM, the world's only motorcycle aerial track in the sky. During the show, a stunt rider continually drives his motorcycle around the disk, keeping an aerialist in constant motion around the track as she performs on a trapeze attached to the motorcycle by a ladder-like rigging.

Beginning the show, the aerialist daringly performs a series of incredible death-defying stunts on the trapeze. Next, she places a strap around her neck and lowers herself until she is held in mid air by nothing but the thin strap.

The motorcycle stunt rider continues to race around the disk with the aerialist spinning rapidly by her neck as she orbits around the disk. The aerialist completes her act by traveling around the disk, performing a series of acrobatic maneuvers as she hangs suspended in air from the trapeze with nothing but her strength, balance and skill to keep her from falling - no nets or safety devices.

To complete the Cyber CycleTM act, the aerialist asks the crowd to direct their attention to the motorcycle rider as he revs his engine and races around the disk faster and faster. As his speed increases, the motorcycle comes completely off the base of the track flying through the air and sparks fly as he performs aerial flips and somersaults from his motorcycle before landing back on the track.

Cyber CycleTM can be performed outside in both daytime and at night. Nighttime performances are particularly beautiful to view with the dramatic lighting features of the Cyber CycleTM. Cyber CycleTM can also be easily modified to accommodate indoor (low roof) performances.
